Communication at its very best: Sedus sofa.

Even in this, the Internet age, direct dialogue is and remains the most important and most efficient way of communicating in the office. Sedus sofa has been specially developed to promote face-to-face communication. It is an extremely comfortable upholstered furniture system with a distinct, elegant style and many design options, which sits equally well in impressive reception areas as on the management floor or in the communicative central areas of open-plan offices.

Design: speziell®

This is what efficient, creative workplaces look like.

Inspiration seldom comes at one's desk. According to scientific studies, people are at their most creative when they feel at ease, when they relax and let their thoughts wander and can talk with others in a laid-back atmosphere. Creating the right conditions for this is becoming a fundamental success factor, especially for companies in innovation-driven sectors. Sedus sofa gives office spaces that stimulating quality which is so important for productive brainwork.

Sedus sopha brings movement into the office.

Movement and changing working postures are important for healthy office work. It's no contradiction that comfortable seating actually aids mobility. Whether for confidential tête-à-têtes, an informal chat with colleagues or a spontaneous team meeting, Sedus sopha creates zones within the room which encourage interaction outside one's personal workstation, whilst also offering a private retreat and break area.

Power is available directly at your seat thanks to the **sopha power supply**. This module can be simply hooked on to all sopho configurations with back and extension elements, enabling retrofitting at any time.

High-quality covers.

In addition to the 30 shades in the Fame collection, a high-quality wool upholstery and 13 attractive shades of leather, many other colours from the Crêpe, Gaja, Remix and imitation leather collections are also available.

Design flexibility.

Sedus sopho can be designed either to harmonise with any colour scheme or create striking highlights. Carcass, extensions and cushions can also be combined in various colours.

With connection.

A version with three power connections or a version with two power connections plus USB charger are available. With integrated power cord approx. 3 m long.

The range at a glance.

Sustainable through and through.

Sustainability and quality “Made in Germany” have been basic corporate principles at Sedus for more than 50 years. These principles are embodied in Sedus sofa and reflected in the way we work: designing products which are recyclable, using ecologically tested materials, conserving resources, being energy-aware in our manufacturing and conducting ongoing quality tests.

For example, semi-aniline dyed leather of the very highest quality is used for the sofa communication furniture. This means that the leather is through-dyed and only as much colour is applied as will allow it to remain open-pored and breathable. When the upholstery is cut out, care is taken to ensure that only a few, small natural features occur in places where they will be visible in order to give the material its unmistakable character.

You will find more details on Sedus’ quality and sustainability philosophy at www.sedus.com/en/ecology

Fabric that lasts longer. Our fabrics are put to the test even before manufacturing – for instance, in relation to tear strength, chemical resistance and light fastness.

Local leather. To ensure top quality and eco-friendly short transport routes, we source our leathers exclusively from South Germany and Austria.

Powder coating instead of paint finish. We employ the more eco-friendly and higher quality powder coating for finishing and protecting against rust.

Chrome, the shining example of eco-friendliness. At Sedus, perfect chrome surfaces include a water treatment plant, which removes production residue from the water.

Company.

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.
